

MAAYANK MALHOTRA

Full Stack Software Engineer

+91 8799730966 | maayankmalhotra095@gmail.com | github.com/MaayankMalhotra | Portfolio: bit.ly/46IAGEv

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of experience designing and building scalable backend services (Node.js, Express.js), responsive frontend applications (React.js, Redux), and secure REST APIs across MERN and Laravel technology stacks. Skilled in microservices architecture, AWS cloud deployment (EC2, S3), and CI/CD pipeline automation, with strong experience in direct client interaction, requirement gathering, and delivering solutions aligned with business needs. Proven track record mentoring junior developers, conducting code reviews, coordinating closely with cross-functional design, QA, and backend teams, and consistently delivering production-grade software on schedule in fast-paced product engineering environments.

CORE TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, Basic C/C++

Frontend: React.js, Redux, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, PHP, Laravel, REST APIs, Microservices Architecture, Apollo GraphQL

Databases & Cloud: MySQL, MongoDB, AWS EC2, AWS S3, Docker

Real-Time & Integration: WebRTC, Socket.io, Pusher, Webhooks & third-party API integration

Tools: Git, BitBucket, Postman, Swagger, Apache, Nginx, CI/CD pipelines, Linux, MacOS

Leadership & Collaboration: Code Reviews, Mentoring, Agile/Scrum Coordination, Cross-Functional Team Communication, Production Support & Debugging

PROFESSIONAL EXPERIENCE

Software Engineer | Thinktail Global Pvt. Ltd.

Aug 2025 – Present

- Lead end-to-end full-stack development of scalable web applications using React.js and Node.js, architecting reusable, maintainable modules that support long-term product growth and reduce technical debt.
- Design and deliver advanced analytics and automation features that streamline client operations, reduce manual workload, and improve reporting accuracy.
- Mentor junior developers through structured code reviews and pair programming sessions, raising overall code quality, consistency, and team output.
- Coordinate closely with design, QA, and backend teams throughout the development lifecycle to ensure on-time, high-quality releases.

Software Engineer | Cracode Consulting Pvt. Ltd.

Aug 2024 – Aug 2025

- Built and maintained Laravel + React.js applications for enterprise clients, designing secure REST APIs used across multiple internal and client-facing services.
- Deployed and scaled APIs handling 1.5M+ transactions per month, focusing on performance, reliability, and fault tolerance under production load, while developing reusable UI component libraries that accelerated delivery across projects.

Software Engineer | Henry Harvin

Jan 2023 – Aug 2024

- Improved platform performance by 20% through backend optimization, database query tuning, and caching strategies.
- Delivered 5 product releases end-to-end, from technical planning through implementation, testing, and production deployment.
- Enhanced CI/CD pipelines for a microservices architecture supporting 1M+ API calls monthly, improving deployment frequency and reducing rollback incidents.
- Developed REST APIs and backend systems for ICICI Lombard and Ninja CRM, improving data reliability, system uptime, and user engagement.
- Collaborated with cross-functional teams to integrate backend services with external systems and third-party platforms, ensuring smooth data flow across the stack.

KEY PROJECTS

Audio/Video Communication Platform (PHP, Node.js, WebRTC, Socket.io): Built a real-time, device-to-device communication system featuring call recording, live chat, and multi-browser support — demonstrating experience with real-time, low-latency data streams comparable to device and sensor communication. *Live: snoutiq.com*

CRM App (MERN): Developed a CRM with lead tracking, pipeline management, task automation, and real-time dashboards with integrated email and notification triggers. *Live: crm.henryharvin.com*

Job Portal (MERN): Built and deployed a full-featured job listing platform on AWS with Nginx and CI/CD, including search filters, resume uploads, and an admin panel. *Live: jobrito.com*

RadiusLift (SaaS Platform): Built core modules for a SaaS platform supporting business workflow automation and subscription-based service delivery, including API integrations and admin tooling. *Live: radiuslift.com*

Think Champ (Client Web App): Delivered a custom web application for a client, handling UI development, API integration, and feature enhancements based on business requirements. *Live: think-champ.com*

Henry Harvin Platform (E-Learning): Contributed to the company's e-learning platform, supporting course delivery, user management, and platform-wide feature updates. *Live: henryharvin.com*

EDUCATION

B.Tech, Electronics — YMCA University | 2018–2022 | CGPA: 7.606

Senior Secondary — D.A.V. Public School | 2017–2018 | 74%

Secondary — D.A.V. Public School | 2015–2016 | CGPA: 8.6

IELTS (Academic) — Band Score: 7
